- Performed testing, debugging, and system maintenance.

Project: Reablist

Academic Project Developer | at ANT Technology Training Center|Jan 2026 – Feb 2026

Role: Frontend Developer

Project Description:

Reablist is a task management (To-Do List) web application that allows users to create, organize, update, complete, and manage their daily tasks through a simple and user-friendly interface.

Responsibilities:

- Developed responsive and interactive user interfaces using HTML5, CSS3, Bootstrap, JavaScript, and Vue.js.
- Integrated frontend components with backend APIs to manage task creation, editing, deletion, and completion.
- Implemented a clean and intuitive UI to improve the user experience and task management workflow.
- Ensured responsive design across desktops, tablets, and mobile devices.
- Collaborated with instructors and classmates to gather requirements, refine features, and improve usability.
- Performed testing, debugging, and frontend optimization to ensure application performance and reliability.

HOBBIES

Passionate about learning new web technologies, building personal projects, exploring UI/UX design, and staying updated with the latest software development trends. I also enjoy solving coding challenges and collaborating with other developers to learn and improve my technical skills.
